Opinion

We need a broader committee

Dear Editor,

I was a member of the State Committee to assess the impacts of oil drilling in Virginia. Unfortunately, Virginians were not part of that work group, nor was it updated before they performed the site visit. The Rockefeller Commission of the State of Virginia has not been asked for the final report of that group. At least they should be asked for their information. As a result, the Rockefeller Committee should have been asked to join their committee to provide information.

Sincerely,

[Signature]

Public Works came to our rescue

Dear Editor,

The Public Works Department came to rescue the Waterstone community last night. We had been using 700 gallons of water a day for a week, and the water department had been trying to get the problem resolved. But they were not successful, and we were running low on water. The Public Works Department came to our rescue and fixed the problem. They were very helpful and friendly, and we appreciate their efforts.

Sincerely,

Vaya con Dios, Jorge

I am from a poor rural town in Guanajuato, Mexico. I have lived here for 20 years, and I am grateful to God for the opportunity to study here in the United States. I am enrolled in the Pre-Spanish class, and I am learning to speak and write Spanish. I am also taking a course in American history, and I am learning about the history of the United States.

Thank you for the opportunity to study here in the United States. I am grateful for your help, and I am looking forward to my future in the United States.

Sincerely,
